

TRIP PLANNER OF MYANMAR

AM-BIRD WATCHING TOUR-09D-08N-2019-2020

Yangon-Bagan-Heho-Kalaw-Inle-Heho-Yangon

All the tropical forests of Burma are home to a multitude of animal species. There are more than 1,000 bird species in Burma. This country serves as a refuge for all kinds of rare bird species, including migratory birds from all over Southeast Asia. While observing the numerous specimens of birds, you will be able to discover the Burmese tropical forest, as well as the mountain at high altitude, the forgotten temples of Bagan without forgetting the magnificent region of the Inle lake which serves as a resting place for migratory birds, (protected area)
